CASE STUDY
PHASE – I (Analysis)
Problem Identification & Class Mapping (CO1)

Group No : 25
Team Members :

Roll No	Student Name
AM.SC.U4AIE25131	**Manish J**
AM.SC.U4AIE25138	**Navaneeth B**
AM.SC.U4AIE25140	**Neeraj V Pillai**
AM.SC.U4AIE25151	**Surya R**

1. Problem Title: **Digital Complaint Management System**

2. **Problem Description**: Manual complaint handling often lacks transparency and proper tracking, leading to delays and inefficiencies. Digital Complaint Management System is designed to manage user complaints in a systematic and organized manner.

In this system, complaints will be recorded digitally, and their status would be continuously tracked. Updates and resolution details will be maintained which ensures accountability and transparency throughout the process. This approach will improve efficiency, reduce delays, and provide a more effective method for handling complaints.

3. Identified Entities (Classes)

Class Name	Description
User	The one who submits the complaint and checks the status

Officer	Resolves complaints by taking necessary action
Complaint	Stores the details of a complaint given by the user (Description and status)
Admin	Manages the platform

4. Class Attributes and Behaviours

Class Name	Attributes	Methods(behaviours)
User	name, contactDetails	submitComplaint(), viewStatus()
Officer	name, department	viewComplaints(), resolveComplaint()
Complaint	description, status	createComplaint(), updateStatus(), viewDetails()
Admin	name	monitorComplaints(), assignOfficer()
